With the integrated NFC TAGS,
go beyond haptic advertising and
transmit digital information.

PENS

HOW DOES NFC WORK?

Near Field Communication, or NFC, is an international communication standard for the wireless exchange of data over short distances. To transmit data via NFC, the smartphone or tablet is held near a pre-programmed NFC TAG that activates a specific application or function in the device, for example. In the NFC PENS the NFC TAG is located directly under the inside NFC logo.

This ensures a simple transfer of information to the smartphone or tablet. Connect analogue writing and advertising with the interactive world using inside NFC PENS.
